

# ROADMASTER LIQUID CALCIUM CHLORIDE

## Product Data Sheet

### General Description

ROADMASTER™ liquid calcium chloride (CaCl<sub>2</sub>) is a concentrated calcium chloride based aqueous solution used for surface dust control and soil stabilization on unpaved roads, road shoulders, embankments, stockpiles and construction sites. ROADMASTER liquid CaCl<sub>2</sub> is also used as a water extender. In highway construction, it is used as an additive to recycled asphalt to reduce voids and improve compaction and stabilization during new construction.

### Applications

Calcium chloride is both hygroscopic and deliquescent. These related properties both involve absorption of atmospheric moisture and retention of moisture present in the soil. Unpaved surfaces treated with this product, when cured and compacted, form a hard and smooth riding surface.

ROADMASTER liquid CaCl<sub>2</sub> has exhibited superior performance on roadway construction materials that are typically difficult to treat.

Product longevity will vary with climate, soil type, degree of compaction of the surface, as well as traffic weight and frequency. Generally, a minimum of three to four months is common and, in some cases, up to one year of residual useful life has been experienced.

### Availability

ROADMASTER liquid calcium chloride is available from over 20 plant and terminal locations throughout North America. For the location nearest you, refer to the plant and terminal map available on our website ([www.tetrachemicals.com](http://www.tetrachemicals.com)) or contact your TETRA sales or customer service representative.

Because use conditions and applicable laws may differ from one location to another and may change with time, Customer is responsible for determining whether products and the information in this document are appropriate for Customer's use and for ensuring that Customer's workplace and disposal practices are in compliance with applicable laws and other governmental enactments. Seller assumes no obligation or liability for the information in this document. NO WARRANTIES ARE GIVEN; ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE EXPRESSLY EXCLUDED. Further, nothing contained herein shall be taken as a recommendation to manufacture or use any of the herein described materials or processes in violation of existing or future patents.

### Safety and Handling

ROADMASTER liquid calcium chloride is a strong salt solution. Wear appropriate protective, impervious clothing. Wear safety glasses with non-flexible side shields or chemical goggles for proper protection of the eyes. Wear appropriate protective non-leather protective gloves and boots. Chemical protective gloves and boots such as PVC or Nitrile are recommended. Leather products do not offer adequate protection and will dehydrate with resultant shrinkage and possible destruction. This product should be handled in areas with proper ventilation. Before using this product, refer to the SDS which is available on the Company's website for complete safety and handling guidelines.

#### PHYSICAL PROPERTIES

<b>Appearance</b>	Clear/colorless liquid
<b>Odor</b>	None
<b>Assay</b>	28 to 38% by weight CaCl <sub>2</sub>
<b>Crystallization Temperature</b>	-38°F (-39°C) to 42.1°F (5.6°C)
<b>Specific Gravity @ 68°F (20°C)</b>	1.264 to 1.378
<b>Bulk Density</b>	10.53 to 11.49 lb/gal

#### CHEMICAL PROPERTIES

<b>Chemical</b>	CaCl <sub>2</sub>
<b>pH</b>	Slightly alkaline
<b>Impurities (on 100% CaCl<sub>2</sub> basis)</b>	
<b>Alkali Chlorides</b>	< 0.1% by weight
<b>Magnesium (as MgCl<sub>2</sub>)</b>	< 0.1% by weight
<b>Other Impurities (not H<sub>2</sub>O)</b>	< 1.0% by weight
